

## VISION-MV

### FISH-FRIENDLY PUMP

The Vision-MV pump is used for fish-friendly pumping of surface water with a capacity of 0.5 to 25 m<sup>3</sup>/min at a head of 0 to about 5 meters.

## FEATURES

- Fish-friendly mixed flow impeller
- Non clogging
- Direct driven
- Water lubricated lower bearing
- Solid stainless steel housing
- Low maintenance
- Circular design, fully recyclable

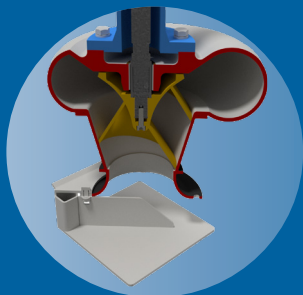

# Vision-MV

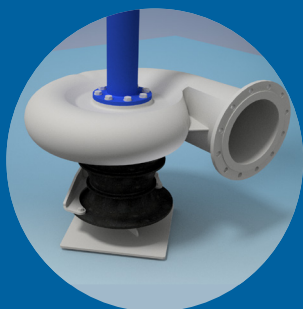

## APPLICATIONS

The Vision-MV pumps are mainly used for the drainage of small polders and sport fields. Further applications are drainage and irrigation of agricultural lands, water level control in nature reserves and circulation of stagnant water.

## FUNCTIONING

The electric motor is installed vertically on the top side of the pump and transfers its power to the pump shaft by a flexible coupling. The pump can be installed in open water or in a (prefab) concrete pit.

## ADVANTAGES

The pump is suitable for practically all drainage and irrigation purposes, is non clogging and designed for a long life time with low maintenance.
